

Universal Dock Cart By Booth Enterprises

Featured is a highly versatile robust universal cart designed primarily for moving material on marina docks, narrow "fingers" and safely up and down gangways (marina ramps). Because of the cart's broad host of features its design also lends itself to numerous other applications.

Single Unit

Other Applications

- Gathering Laundry
 - Ice Delivery
- Unloading Fish from Charter Boats
- Moving Equipment

Made In Victoria, BC,
Canada

High Density Stacking

Features:

- **Roto-Molded Polyethylene Construction** is light weight, rugged and will not deteriorate (corrode) in even the most hostile environments (saltwater marina).
- **Large capacity and strong construction** will safely transport expensive payloads.
 - Over 7 cu-ft volume will carry in excess of 300 lbs.
- **Its 27 inch width** is highly maneuverable and easily passes through doorways, narrow dock fingers and can turn in very minimal space (end of a dock finger).
- **Unlike wheel barrows** can be easily steered with one hand, without lifting and allowing the other hand free to carry extra items.
- **Built to Last** – Air filled wheels have replaceable bearings with grease nipples. Additionally the bottom is protected with skid plates.
